Subject: Site visits to the Superfund site EMF; OU FMC and Simplot and the Agrium RCRA site 3/25-27/2014

Kevin, Peter and Jannine,

I have spoken to each of you separately regarding my trip to Pocatello and Soda Springs to provide oversight of drilling and sampling activities (FMC), visit the Agrium facility and to gain insight on this site and have a better understanding of the geography, surface geology and feel for the site operations when reviewing the 2013 annual report and the possible data needs for 2014 and for the Simplot site to view the newly installed extraction and treatment system in the PAP area.

I have made the necessary contacts for each facility and I will be leaving Seattle on Tuesday morning at a dark early and should arrive at the FMC site near 1:00 pm. The following is my itinerary for the week:

Tuesday March 25: FMC

When I arrive at the site I will contact Jesse Stewart, MWH who is the lead for this investigation. I will also work with Paul DesFosses our oversight contractor provided by BAH.

I will also contact Monty Johnson, Simplot to confirm my site visit at the Don Plant for Thursday morning.

Wednesday March 26: FMC & Agrium

I will return back to the FMC site to continue my oversight but I will leave the site at 11:00 am to drive to Agrium or Soda Springs.

I will meet Brandon Green, Agrium at 1:00 pm and visit the highlights of this RCRA site and was told that it should take approximately 4-hours.

Thursday March 27: Simplot and FMC

I will meet Monty at the Don Plant in the morning and will visit the new treatment system and hopefully view the latest water quality info. I will return to the FMC site until I depart to the airport.

I will be staying at the Ameritel Hotel in Pocatello (208-234-7500) and flying in and out of Idaho Falls, Idaho. If you need to reach me I will have my cell phone and you can call me at 206-920-4901.

I will back in the office on Friday March 28.

Let me know if you have any questions on any of the above.

Bernie
